

Germán Anguiano

Full-Stack developer Jr.

 Cd. Obregón, Sonora, México

Multimedia Production Engineer transitioning into software development, with hands-on experience building full-stack applications (Django, Spring Boot, React) and 3 years documenting software systems in production environments.

EXPERIENCE

Media Aérea

Documentation Specialist

June 2022 – May 2025

- Created and maintained software documentation.
- Drafted and developed key documents such as ECU (Use Case Specification), EIU (User Interface Specification), MCU (Use Case Model), RDP (Testing Requirements), CRN (Business Rules Catalog).
- Designed supporting diagrams, including Use Case Diagrams and Process Maps.
- Conducted client meetings to review and approve project deliverables.
- Organization of teamwork for delivery of software documents.
- Contributed to the company's ISO 9001 certification process by developing and standardizing software documentation aligned with quality management requirements.

Projects

- **GUI Guess Number** — Number-guessing game with a Java Swing GUI; the user enters a number between 1 and 10 and clicks a button to check it against a randomly generated number, with input validation and error handling for non-numeric entries.
- **Pomodoro App** — Productivity timer based on the Pomodoro technique (work/break cycles), with start/pause/reset controls. Built with HTML, CSS, and JavaScript.
- **Personal Blog** — Static blog site with a post listing page and individual article view. Built with HTML, CSS, and JavaScript.
- **Progress Bar** — Reusable, animated progress bar component with controlled state in React.
- **Discord Bot** — Discord bot built in Python that automatically sends images to a channel via commands.
- **Rock-Paper-Scissors Game** — Rock-paper-scissors game against the computer, with result logic, built in Python.
- **To-Do App** — Task management app with full CRUD operations (create, read, update, delete), MySQL persistence via JPA/Hibernate, and a Spring Boot backend with Thymeleaf views.
- **Web Portfolio** — Personal portfolio site with project, experience, and contact sections; Django backend with PostgreSQL database, JavaScript for frontend interactivity, and responsive styling with Bootstrap.

TECHNICAL SKILLS:

- **Programming Languages:** Python, JavaScript, Java.
- **Web Development:** HTML, CSS, .Bootstrap, Thymeleaf.
- **Frameworks:** Django, React, Spring Boot.
- **ORM & Persistence:** JPA (Hibernate), Lombok.
- **Databases:** SQL (SQLite, MySQL, PostgreSQL).
- **Version Control:** Git, GitHub.
- **Tools:** Microsoft Office Suite (Word, Excel, PowerPoint).

SOFT SKILLS

- Proactive, Teamwork skills, open-minded, problem-solving skills, adaptability.

EDUCATION

- **Bachelor's Degree in Multimedia Production Engineering**
Universidad La Salle Noroeste
2022
- **Professional Competency Development in Engineering**
Universidad La Salle Noroeste
2023

CERTIFICATES:

The Legend of Python — Python Certificate by Codédex.

The Origins I: HTML — HTML Certificate by Codédex.

The Origins II: CSS — CSS Certificate by Codédex.

The Origins III: JavaScript — JavaScript Certificate by Codédex.

Framework Valley: React — React Certificate by Codédex

Java — Java Certificate by Codédex.

LANGUAGES:

- **Spanish:** Native.
- **English:** B2-CEFR level.
